

Writing – An essay suggesting solutions to problems

Plan:

Introduction

Paragraph 1 – state the problem and its cause

Main Body

Paragraph 2 – first suggestions, examples and expected result

Paragraph 3 – second suggestion, examples and expected result

Conclusion

Paragraph 4 – summarise your opinion

Suggestions:

1. We can use full loads of dishes/clothes when we do the washing up/washing
2. Governments can pass laws to stop factories from wasting and polluting water
3. Governments could also stop water companies from wasting millions of litres of water because of leaking pipes
4. Factories should be stopped from pouring chemicals into lakes and rivers

Expected results:

- a. We would save many litres of water every day
- b. We would have a lot more clean water around
- c. Many cities would successfully save water by repairing pipes
- d. Lakes and rivers would be clean and animals would suffer
