

OUR EUROPEAN EDUCATION

The mission of the European Schools is to provide a multilingual and multicultural education for nursery, primary and secondary level pupils.

Education is designed to:

prepare children for a happy, healthy, responsible, and successful life

develop children's personality and abilities

support children's learning potential

build up respect for others and the environment

respect and appreciate children's own cultural and social identity, its values and those of others

promote a European spirit.

Education is a fundamental part of lifelong education and learning and its central role is to support children's growth into ethical and responsible members of society.

Teaching and learning in the early years support and monitors children's physical and psychological wellbeing, including social, cognitive and emotional development and helps to prevent any difficulties that may arise by creating the best possible learning opportunities.

It is important to strengthen children's healthy sense of self-esteem with the aid of positive learning experiences and to provide opportunities for diverse interaction with other people. Children's world of experiences will be enriched, and they should be assisted as they seek to find new areas of interest.

What Are the Advantages of BEING EUROPEAN?

I CAN TRAVEL EASILY
